BLOODYMARES (V0.3 - V0.10)

<https://boosty.to/bloodymares>

This game guide was initially started as an independent project by **Zoey Raven**, and he worked on the walkthroughs for the first 2 Chapters. I (**BloodyMares**), as a fan of the game, decided to offer my help with proofreading and playtesting to help make this guide as accurate and helpful as possible.

However, because Zoey had a lot on his shoulders, making guides for many other adult games at the same time, he couldn't continue working on it anymore. So, Zoey asked me to take over and I gladly accepted. Thanks to his immense help and guidance, I was able to step-in and continue where his work. As a long-time fan of guidebooks published by Prima Games, I was inspired to turn this into my passion project, focusing on presentation and usability of the guide as well as accuracy of information and attention to details.

Around this time, **Eva Kiss** showed interest in featuring this guide for the game to share it with their supporters, so that's how this guide became official! Please, support Eva for making this game!

DISCLAIMER

This guide will do its utmost to make sure your journey through the game is as painless as possible, providing you with the best decisions for each variable and detailed information to help you make your own wherever possible. However, this guide is a work in progress. I do not take responsibility for inconsistencies or errors that you might encounter while playing the game. Every question regarding the technical problems should be directed to Eva Kiss.

HOW TO USE THIS GUIDE

NAVIGATION

THIS DUAL-PROTAGONIST GAME IS A NON-LINEAR EXPERIENCE WITH VARIETY OF CHOICES THAT IMPACT THE STORY AND CHANGE THE OUTCOME OF THE GAME. THE STORY IS TOLD IN CHAPTERS FROM DIFFERENT POINTS OF VIEW. THESE POINTERS WILL HELP YOU NAVIGATE THROUGH THE INTERWOVEN STORY:

SCENE REPRESENTS LOCATION WHERE CURRENT EVENTS TAKE PLACE.

EVENT IS A UNIQUE SCENE THAT IS AFFECTED BY YOUR PREVIOUS DECISIONS. USUALLY TIED TO CHARACTER PATHS.

BRANCH INDICATES DIVERGING ROUTES WITHIN SCENES OR EVENTS.

FOR CONVENIENCE, TRANSITIONS BETWEEN ALL OF THESE ARE BOOKMARKED WITH "GO TO: **BOOKMARK**"

VARIABLES

TO ENRICH THE ROLE-PLAYING OPPORTUNITIES, THE GAME USES THE FOLLOWING VARIABLES:

STATS

THERE ARE 6 DIFFERENT STATS IN THE GAME

WITS, **CHARISMA**, **ATHLETICS**, AND **LUST** DETERMINE DIFFERENT TRAITS OF YOUR PROTAGONISTS THAT YOU CAN LEVEL UP.

CERTAIN ACTIONS AND CHOICES WILL GIVE YOU EXPERIENCE POINTS [STAT + XP] RELATED TO ONE OF THESE FOUR BASIC SKILLS.

EARNING ENOUGH [STAT + XP] WILL INCREASE YOUR SKILL LEVEL. PAY ATTENTION TO THE YELLOW BAR TO TRACK YOUR EXPERIENCE POINTS.

MONEY AND **WILL** CANNOT BE LEVELED UP. THESE ARE RESOURCES THAT CAN BE EARNED (+) AND SPENT (-).

AGENDA

[AGENDA +/-] REPRESENTS YOUR RELATIONSHIP WITH OTHER CHARACTERS. EACH CHARACTER USES THEIR OWN UNIQUE COLOR (**IAN**, **LENA**, **PERRY**...)

HERE YOU CAN CHECK YOUR RELATIONSHIP STATUS WITH EACH CHARACTER AND SEE ITS PROGRESSION THROUGH THE BAR. THERE ARE 12 TOTAL AGENDA POINTS:

Due to non-linear nature of the game, certain events can be triggered by various combinations of choices.

For simplicity, this guide uses [Event Triggers] and Status Points.

[Event Triggers] are hidden variables that represent your choices and affect your narrative. It's important to remember which ones are **ACTIVE**. To make this task easier, **REFERENCE AND CHECKLIST** provides a full list of relevant variables (WIP) with notes describing the consequences:

ACTIVE: [trigger = True]

INACTIVE: [trigger = False] (default status for most variables).

Status Points are the hidden in-game stats that represent various character attributes.

They function similarly to [Event Triggers], with one major difference: you can **INCREASE** or **DECREASE** their value.

Sometimes you need to earn Status Points to unlock [Event Triggers].

PROLOGUE

NOTE: Before you start the game, you have the option to choose the difficulty and disable the tutorials.

Easy Mode will let you start the game with all stats at **LEVEL 2** for **IAN** and **LEVEL 3** for **LENA**. This head start will help you meet most of the requirements for all of the content in Chapters 1 – 3.

Cheat Mode will max out all of your **SKILLS** to **LEVEL 10** as well as give you **99 MONEY** and **99 WILL**. Pick this option if you never want to bother with stat management. **Not recommended for your first playthrough.**

If you wish to have the best role-playing experience, it is recommended to play in **Story Mode**.

[!] FIGHT TUTORIAL:

This is your first serious fighting opportunity. Every action has a time window and requires quick thinking. The higher your **kickboxing** or **jiujitsu** stats are, the more time you can take to react in this fight. If you fail to react, then you'll leave yourself open to enemy attacks and will get hit.

You start with the **INITIATIVE** and can do several things: **Attack**, **Guard up**, **Provoke** or **Tap out**. Successful **Attack** leads into **OFFENSE** and **Guarding** into **DEFENSE**. **Provoking**, if successful, can leave the opponent open to your attacks or make it easier for you to **Evade** incoming attacks. **Tap out**, if you don't feel confident or want to stop the fight. Keep in mind that these last 2 actions can leave you open, so pay attention to your enemy before deciding the best approach.

On the **OFFENSE**, you can **Punch**, **Grapple** or perform a special move that you've learned. You can also **Stand back** if you change your mind and want to gain the **INITIATIVE**.

While you're on the **DEFENSE**, you can **Block** or **Evade**. Successful defense allows you to **COUNTER** and go into the **OFFENSE**.

Your objective is to defend yourself for 3 rounds. After the final round, if you've dealt more damage than received ($v7_fight > 1$), or managed to defeat the opponent before that, then **YOU WIN**. If you've taken more damage than the opponent ($v7_fight = 0$) or got knocked out during the fight, then **YOU LOSE**. Otherwise, the fight ends in a **DRAW**.

[!] NEW VARIABLE:

`book_points = 0` – *Ian's Book value*

[!] NOTE:

Now that Ian is close to finishing his book, it is finally revealed how each option is rated based on the genre you picked for Ian's book. For the book to be well received you need at least `book_points > 5`. The best-written book gives you the max value of `book_points = 8`.

In this chapter, you get a chance to rewrite two plot elements (book cards). Make sure to ask Holly and Perry for their feedback. If Perry can't offer any advice, it means your book is better than average. Holly gives Ian advice that would help perfect the book even if she liked the first draft.

Below you can see the values of each book card. The book cards that don't affect the value are not listed.
